# Samsung galaxy buds 2 manual pdf reader instructions manual

3 Tap Touch and hold and select touch-and-hold features for each earbud under Left or Right. The charging case, which has a built-in battery, is charged along with the earbuds that are in the charging case when connected to the charger. The earbuds will enter Bluetooth pairing mode automatically and a pop-up window will appear on your mobile device. • The items supplied with the Galaxy Buds2, any available accessories, and their images may vary depending on the region or service provider. Basics 4 • Do not use earbuds while driving or riding. Do not store your device and some accessories (sold separately) near magnetic fields. To manually reconnect the earbuds to your mobile device, launch the GalaxyWearable app on the mobile device and tap Connect. Reducing the battery consumption When you are not using the earbuds, store them in the charged charging case.The touch-sensitive sensor will continue to work while wearing the earbuds and reduce the usage time. To repeat what you said before or to say something new, touch and hold the earbud. • If you charge the Galaxy Buds2 while the charger port is wet, the Galaxy Buds2 may be damaged.Thoroughly dry the charger port before charging the Galaxy Buds2. • This product includes certain free/open source software.The licence information of the open source software used in this product can be found at opensource.samsung.com. Launch the GalaxyWearable app on your mobile device and tap Tips and user manual to view the quick tips for using the Galaxy Buds2.Tap User manual to view the full user manual. If the results on the screen say you need to adjust your earbuds, try adjusting your earbuds or changing the ear tips, and tap Retry to start the test again. GalaxyWearable App 35 Bixby voice wake-up Wake Bixby with your voice to start a conversation with an intelligent voice assistance service. The battery does not charge properly (For Samsung-approved chargers) • Ensure that the charging contacts of the earbuds and the charging contacts of the charging case are in contact with each other. A small gap appears around the outside of the Galaxy Buds2 • This gap is a necessary manufacturing feature and some minor rocking or vibration of parts may occur. Also, you can set the ambient sound mode to activate automatically. • Stop using theText-to-Speech feature. – It is set by default to activate the noise controls mode. • Keep the charging case closed while you store or charge the earbuds, or when you charge the charging case. • For your safety, you must not attempt to remove the battery. • If you will not be using your Galaxy Buds2 for a long time, store them after they are charged. IE Page 9 www.samsung.com USER MANUAL English. Once the connection has been established, the earbuds will be automatically connected to your mobile device whenever you open the charging case while the earbuds are inside it. • To avoid damaging the touch areas, do not touch the earbuds with anything sharp. If the earbuds or the charging case were exposed to foreign materials, wipe them with a soft and dry cloth before inserting them into the charging case. • Keep the earbuds dry. Model: SM-R177 Rated voltage/current: 5V / 120 mA (earbuds), 5V / 500 mA (charging case), 3.8V (internal battery) Made inVietnam by Samsung PO BOX 12987, DUBLIN. 4 Touch and hold the right earbud and release your finger when you reach the desired volume to increase the volume. • Do not pull the ear tip excessively when you attach or detach it.The ear tip may tear. • Do not allow water to come into contact with the touch area.The touch area may malfunction in humid conditions or when exposed to water. When the charging case battery indicator light flashes in red, take out the earbuds from the charging case and insert them into the case again. Using the earbuds 26 Using the noise controls mode Introduction There are two noise controls mode: active noise cancelling and ambient sound mode. • This feature is available only when a mobile device that supports Bixby is connected. Using the equaliser You can select from six different equaliser options and enjoy the same music with a different and unique sound. IE Page 11 www.samsung.com USER MANUAL English. • Active noise cancelling with one earbud: Launch the active noise cancelling feature with just one earbud. • Follow all posted warnings and directions from authorised personnel in areas where the use of wireless devices is restricted, such as aeroplanes and hospitals. Remove any earwax or debris with a clean, dry, and soft brush, cotton swabs, or other tools. The connections between your earbuds and the mobile devices can be switched automatically under the circumstances. Triple touch • Play previous track. Setting the noise controls mode Activate or deactivate the active noise cancelling or ambient sound mode based on your situation or surroundings. Launch the GalaxyWearable app on your mobile device, tap Earbuds settings → Bixby voice wake-up, and then tap the switch to activate it. • Modifying the device’s operating system or installing software from unofficial sources may result in device malfunctions and data corruption or loss.These actions are violations of your Samsung licence agreement and will void your warranty. 1 Launch the GalaxyWearable app on the mobile device, tap Touch controls, and then tap the switch to activate it. • When connecting earbuds with a mobile device that has been signed in to a Samsung account, the earbuds pairing information will be synced on the other mobile devices that use the same Samsung account and you do not need to pair them at the beginning again.To connect the other devices that use the same Samsung account with the earbuds, on the mobile devices that you want to connect, launch the Settings app, tap Connections → Bluetooth, and then select the earbuds synced through the Samsung account. • Clean the earbuds regularly to prevent earwax or debris from building up in the microphone hole, speaker, and air duct. Using the earbuds 18 • If the earbuds do not connect to a mobile device within three minutes, Bluetooth pairing mode will be deactivated. Keep a safe distance between your device and objects that may be affected by magnets such as credit cards and implantable medical devices. • Legal information:View the legal information for the Galaxy Buds2. • Only some languages are available depending on Bixby set on your mobile device. 2 Wear the both earbuds in your ears and tap Start. Copyright Copyright © 2021 Samsung Electronics Co., Ltd. • Active noise cancelling: Activate the active noise cancelling feature. This manual is protected under international copyright laws. Basics 13 4 Turn on theWireless power sharing feature on the device that functions as a wireless charger and place the centre of the charging case’s back on the device that functions as a wireless charger. Alternatively, say“Hi, Bixby”. Connecting the earbuds to a Samsung mobile device for the first time 1 Check the direction of each earbud and correctly insert them into their corresponding slots in the charging case. The following features will be launched in order whenever you touch and hold the earbud: active noise cancelling and ambient sound mode. The device and some accessories (sold separately) contain magnets.The American Heart Association (US) and the Medicines and Healthcare Products Regulatory Agency (UK) both warn that magnets can affect the operation of implanted pacemakers, cardioverters, defibrillators, insulin pumps or other electro medical devices (collectively, “Medical Device”) within the range of 15 cm (6 inches). 1 Launch the GalaxyWearable app on your mobile device and tap Earbuds settings → Earbud fit test. Using the earbuds 28 Tips for better voice recognition • Speak clearly. Use the earbuds only after they have been repaired at a Samsung Service Centre. Connecting with new earbuds You can temporarily disconnect the earbuds from your mobile device and connect additional ones. 3 Launch the GalaxyWearable app on your new mobile device and follow the on-screen instructions to complete the connection. • Some features may not be available depending on the type of connected mobile device. • If you want to connect to another mobile device after a connection has been established, refer to Connecting with other devices after disconnecting from the previous mobile device. The noise controls mode does not work well • Wear both earbuds in your ears and launch active noise cancelling, which is one of the noise controls mode. Earbud fit test Check the earbuds’fit to ensure the best sound and active noise cancelling. 4 Place the centre of the charging case’s back on the centre of the wireless charger. • You can download the GalaxyWearable app only on mobile devices running Android operating system 7.0 (API 24), or later, and with 1.5 GB of RAM or more. If the charging case has low battery, connect the charging case to the charger first. • The charging speed or efficiency may vary depending on the device’s condition or the surrounding environment. Launch the GalaxyWearable app on the mobile device, tap Earbuds settings → Equaliser, and then select an option you want. You cannot hear others speaking Adjust the volume on the connected mobile device. Launch the GalaxyWearable app on your mobile device, tap Earbuds settings → Seamless earbud connection, and then tap the switch to activate it. Activate the active noise cancelling feature to block out the external sounds around you. Discoloration or corrosion may cause damage to the Galaxy Buds2. Using the earbuds 24 Understanding touch actions Single touch • Play or pause track. • The GalaxyWearable app must be installed on your mobile device. IE Page 13 www.samsung.com USER MANUAL English. Double touch • Play next track. Basics 12 Wireless charging The charging case has a built-in wireless charging coil.You can charge the battery by using a wireless charger (sold separately) or another device that functions as a wireless charger. • The earbuds’touch actions are set to single touch and touch and hold by default.To use all the earbuds’touch actions, launch the GalaxyWearable app and tap Touch controls to activate the related features. Launch the Settings app on the mobile device, tap Connections → Bluetooth, and then tap the switch to deactivate the Bluetooth feature. Prevent liquid from contacting or entering the earbuds. Alternatively, unpair the earbuds from your mobile device under Paired devices. Using the earbuds 29 Adjusting the volume You can adjust the volume by touching and holding the earbud after setting it as a touch-and-hold feature. • Do not use offensive or slang words. R L 3 Close the charging case. GalaxyWearable App 37 About earbuds View the information of the Galaxy Buds2. • Ensure that the latest software version is installed on the earbuds. Make sure they are compatible with the Galaxy Buds2 before purchase. • In dry environments, static electricity can build up in the earbuds. • Connecting the charger improperly may cause serious damage to the charging case. • Off: Deactivate the noise controls mode. • Although the Galaxy Buds2 comply with international safety standards, inserting the earbuds forcefully or wearing them for a long time may cause pain or skin irritation. • Do not touch the Bluetooth antenna of a connected device. If you are not notified of the incoming call’s phone number or the name saved in your contacts via voice notification, launch the GalaxyWearable app on the mobile device and tap Earbuds settings → Read notifications aloud → See all.Then, tap , select All, and then tap the Incoming call switch to activate the feature. Launch the GalaxyWearable app on the mobile device, tap Earbuds settings → Equaliser, and then select an equaliser option you want. • Ambient sound volume: Adjust the ambient sound volume. – If you touch the earbud three times three seconds after a track begins playing, it will start the track from beginning.Touch the earbud three times within three seconds of when a track begins playing to play the previous track. Using the earbuds 27 Using Bixby Introduction Bixby is a user interface that helps you use your device more conveniently. Use only Samsung-approved battery, charger, and cable specifically designed for your device. • If the earbuds’touch feature becomes unresponsive or the earbuds do not work properly, insert the earbuds into their corresponding slots in the charging case, which is not discharged, close the charging case, and then remove them after seven seconds or more. 2 Drag the Ambient sound volume adjustment bar to adjust its volume. GalaxyWearable App 33 Switch the mobile devices connected with earbuds When the earbuds are connected with two or more mobile devices, you can switch the mobile devices easily without disconnecting from the previous mobile device. 4 Connect the USB cable to the charger and then plug the USB cable into the charger port. IE Page 7 www.samsung.com USER MANUAL English. For more information about available accessories, refer to the Samsung website. 2 Check the direction of each earbud and correctly insert them into their corresponding slots in the charging case. Playing the next track Double touch the earbud to play the next track. Launch the GalaxyWearable app on your mobile device, tap Earbuds settings → Accessibility. If you are unsure if the active noise cancelling feature is activated, check it on the GalaxyWearable app. Using the earbuds 19 Connecting to a non-Samsung mobile device that also uses the Android OS (or, the connection pop-up window does not appear) If you connect to a non-Samsung mobile device that also uses the Android OS, some of the features of the earbuds may not be available and the earbuds may not work properly. L Using the earbuds 23 Using the earbud by touch Introduction Touch the earbud to play or stop music or answer or reject calls.You can also set the earbuds to perform other actions by touch. • Only mobile devices that support theWireless power sharing feature can charge the Galaxy Buds2.To see mobile devices that support theWireless power sharing feature, visit the Samsung website. The Galaxy Buds2 may not charge properly or may overheat, or the charging case may be damaged. • Do not press the ear tip excessively or twist it.The ear tip may be damaged. • Connection methods may vary depending on your device and software version. • If foreign materials are placed on the touch-sensitive sensor, they may cause the sensor to malfunction. • Exposure to loud sounds while walking may distract your attention and cause an accident. • Decline a call. Instructional icons Warning: situations that could cause injury to yourself or others Caution: situations that could cause damage to your device or other equipment Notice: notes, usage tips, or additional information Basics 5 About the Galaxy Buds2 Galaxy Buds2 are wireless earbuds which allow you to listen to music or answer incoming calls after connecting them to your mobile device even while doing other activities, such as working out. 3 Close the charging case. You can stream music played from the connected mobile device. It will automatically switch to stereo mode when both earbuds are connected to your mobile device. Any damage caused by misuse is not covered by the warranty. Doing so may result in accidents due to slowed reaction times. IE Page 5 www.samsung.com USER MANUAL English. Cleaning the microphone hole, speaker, and air duct If the volume is lower than it should be with the current setting, clean the microphone hole, speaker, and air duct. • If the remaining battery power of the device that functions as a wireless charger drops below a certain level, power sharing will stop. 2 Align the latch at the bottom of the earbud and groove of the ear tip and cover the latch with the ear tip. Appendix 40 The battery depletes faster than when first purchased • When you expose the Galaxy Buds2 to very cold or very hot temperatures, the useful charge may be reduced. Appendix 44 Removing the battery • To remove the battery, contact an authorised service centre.To obtain battery removal instructions, please visit www.samsung.com/global/ecodesign_energy. IE Page 3 www.samsung.com USER MANUAL English. • Use only Samsung-approved accessories. Launch the GalaxyWearable app on the mobile device and tap Earbuds settings → Reset. • Software information:View the earbuds’software information. Doing so may damage or reduce the lifespan of the USB cable. The device that functions as a wireless charger 5 After fully charging, disconnect the charging case from the device that functions as a wireless charger. Cleaning the charging contacts If the battery does not charge properly, wipe the charging contacts with a dry cloth. Launch the GalaxyWearable app on the mobile device and tap Earbuds settings → About earbuds. Reconnecting mobile devices with the earbuds that temporarily disconnected To reconnect the earbuds that temporarily disconnected from a device, insert them into the charging case and close it.Then, open the charging case again. • You cannot use your earbuds’wireless features while charging the earbuds’batteries. Launch the GalaxyWearable app on the mobile device. Waking up Bixby using your voice You can start a conversation with Bixby by saying“Hi, Bixby”while wearing the earbuds. Sound is emitted from the connected mobile device, not the earbuds, during a call • Check if you are wearing the earbuds properly. Use it when you want to avoid distractions, such as when listening to music. Basics 6 Device layout and functions Package contents Refer to the quick start guide for package contents. Trademarks • SAMSUNG and the SAMSUNG logo are registered trademarks of Samsung Electronics Co., Ltd. Connecting with other devices after disconnecting from the previous mobile device 1 Disconnect the earbuds from the previous mobile device. Never use a damaged USB cable. • Ensure that there are no obstacles between the earbuds and a connected device, including human bodies, walls, corners, or fences. Charging contacts Appendix 43 Cleaning the earbuds and charging case When the charging case and earbuds are exposed to foreign materials, such as dust, sand, or metal shavings, the Galaxy Buds2 may not charge properly or may be damaged. For more information, refer to Connecting to a mobile device. • App notifications to read aloud: Select the apps you want to receive notifications from and change the notification settings for each app. • The battery is consumable and the useful charge will get shorter over time. • Ensure that your earbuds and the other Bluetooth device are within the maximum Bluetooth connection range (10 m).The distance may vary depending on the environment the devices are used in. • Read aloud while using phone: Set the earbuds to receive notifications of the mobile device even when you are using the mobile device. You can only activate the noise controls mode when wearing both earbuds in your ears. • The charging time and the remaining battery may differ between the two earbuds due to different inner components. For example, when your earbuds are registered on both a tablet and a smartphone, you can receive an incoming call from the smartphone with your earbuds while watching a video on the tablet since the earbuds’ connection is switched to the smartphone automatically. • If it is the first time connecting the earbuds and a mobile device, refer to Connecting to a mobile device for more information. 2 Tap the Touch and hold switch to activate it. 3 Open the charging case. The earbuds will emit a sound and the test will begin. • All other trademarks and copyrights are the property of their respective owners. • When the volume adjustment feature has been already selected and you try to change the one side’s touch-and-hold feature, the other side’s touch-and-hold feature is automatically set to activate the noise controls mode. GalaxyWearable App 36 Labs Minimise audio delay to remove the time lag from the video and sound output, and listen to vivid sound when launching a game. Basics 14 Checking the battery level Connect the earbuds to your mobile device, launch the GalaxyWearable app on the mobile device, and view the battery status of the earbuds and the charging case. Using the earbuds 17 3 Open the charging case. GalaxyWearable App 34 Touch controls Configure settings for the touch features of the earbuds. • Remove the earbuds from your ears and put them in again. If the pop-up window does not appear or if you want to connect to a non-Samsung mobile device that also uses the Android OS, refer to Connecting to a non-Samsung mobile device that also uses the Android OS (or, the connection pop-up window does not appear). • Prolonged skin contact with foreign materials on the earbuds may cause irritation. The earbuds will enter Bluetooth pairing mode automatically. If the tips above do not solve the problem, contact a Samsung Service Centre. • Samsung does not accept liability for any damage or loss (whether in contract or tort, including negligence) which may arise from failure to precisely follow these warnings and instructions, other than death or personal injury caused by Samsung’s negligence. If you use other wireless chargers, the battery may not charge properly. Audio quality is poor • Wireless network services may be disabled due to issues with the service provider’s network. Be careful not to connect your earbuds to another person’s mobile device. Reset You can reset all your earbuds settings. • Before using other mobile devices, make sure they are compatible with the device.Visit the Samsung website to see the specifications of compatible mobile devices. Using the GalaxyWearable app, you can view the Galaxy Buds2 status and customise their settings. • Ensure that the latest version of the GalaxyWearable app is installed on the mobile device. • If only a single earbud is connected to your mobile device, restart the earbuds to connect them both.To restart the earbuds, refer to Restarting the earbuds for more information. • Do not clean the earbuds with compressed air or use ultrasonic waves or external heat sources if dust, sweat, ink, oil, or chemicals (cosmetics, sunscreen, antibacterial spray, hand sanitiser, detergent, insecticide, etc.) come into contact with the earbuds and charging case. If the earbud battery indicator light does not flash, connect the charging case to the charger and charge them for more than 10 minutes. • Do not use the Bluetooth feature for illegal purposes (for example, pirating copies of files or illegally tapping communications for commercial purposes). • You can purchase additional accessories from the Samsung website. Remove the earbuds from the charging case and insert them again. Use a pair of ear tips that fit your ears and wear the earbuds properly. The Galaxy Buds2 may not recognise what you say or may perform unwanted commands depending on your surroundings or how you speak. • If the earbuds do not connect to a mobile device, the connection pop-up window does not appear, or your mobile device cannot find the earbuds, store them in the charging case and touch and hold both earbuds for more than three seconds to enter Bluetooth pairing mode manually.When Bluetooth pairing mode has been entered, the earbud battery indicator light will flash from red to green. Refer to Activating the noise controls mode for more information. IE Page 2 www.samsung.com USER MANUAL English. • Descriptions are based on the device’s default settings. Basics 8 Attaching an ear tip to the earbud • Do not put the earbuds in your ears without ear tips. Playing the previous track Touch the earbud three times to play the previous track. Restarting the earbuds If the earbuds’touch feature becomes unresponsive or the earbuds do not work properly, restart the earbuds. • If you select the volume adjustment feature as one side’s touch-and-hold feature, the other side’s touch-and-hold feature is also automatically set to the volume adjustment feature. Touch areas • To avoid hurting your ears, do not apply excessive pressure to the earbuds with your fingertips. 3 Tap Touch and hold, and select Volume down or Volume up under Left or Right. • Battery information: Check the earbuds and charging case’s battery information. Playing or pausing the track Touch the earbud to play and pause the track. 38 Appendix Troubleshooting Before contacting a Samsung Service Centre, please attempt the following solutions. • If an earbud’s touch-sensitive sensor does not make contact with your ear, the earbud may not work. If the Galaxy Buds2 overheat or feel hot for a prolonged period, do not use them for a while. • If you want to connect to another mobile device after a connection has been established, refer to Connecting with other devices after disconnecting from the previous mobile device. • Download and install: Check for and install updates manually. To answer the call, double touch the earbud. If the battery is not properly removed, it may lead to damage to the battery and device, cause personal injury, and/or result in the device being unsafe. Earbud battery indicator light Earbud battery indicator light Colour Status Continuously red • Charging Continuously green • Fully charged Flashes red • Charging blocked due to abnormal temperatures Basics 15 Charging case battery indicator light Charging case battery indicator light Colour Status Continuously red • Charging Continuously green • Fully charged Flashes red (rapid pace) • Charging blocked due to abnormal temperatures Flashes red (flashes after closing the charging case) • Battery power is low (lower than 10 %) Red (stays on for five seconds after closing the charging case) • Battery power is low (between 10 % and 29 %) Yellow (stays on for five seconds after closing the charging case) • Battery power is moderate (between 30 % and 59 %) Green (stays on for five seconds after closing the charging case) • Battery power is high (more than 60 %) • The charging case battery indicator light flashes red when the external power is cut off during charging. • If you

connect the earbuds to your mobile device while listening to music, the volume may change. Using the earbuds 25 Locking the earbuds’touch feature You can prevent unintended actions by locking the earbuds’touch feature. Galaxy Buds2's battery status Customise your Galaxy Buds2 settings GalaxyWearable App 32 Connecting and disconnecting the earbuds Disconnecting mobile devices from the earbuds Insert the earbuds into the charging case and close it.The Bluetooth connection will end. Charge the battery completely before using the earbuds. Appendix 42 Managing the Galaxy Buds2 Basic maintenance • Use a soft, dry cloth to clean the earbuds after use. • Wash the ear tips with clean water and dry them thoroughly after use, and wipe the earbuds with a soft, dry cloth if they are contaminated. Touch and hold the left earbud and release your finger when you reach the desired volume to decrease the volume. Certain features may not be available depending on your region. • Some content may differ from your device depending on the region, model specifications, or device’s software. Tips and user manual View how to use the Galaxy Buds2. IE Page 8 www.samsung.com USER MANUAL English. • Check whether there is a buildup of foreign materials in the microphones located at the top and bottom of the earbuds, and clean them if required. Doing so may hurt your ears. • Tap: Play or pause track. Before wearing the earbuds, clean the sensor first. • Over time, friction between parts may cause this gap to expand slightly. IE Page 12 www.samsung.com USER MANUAL English. • Some devices, especially those that are not tested or approved by the Bluetooth SIG, may be incompatible with the earbuds. First disconnect the USB cable from the charging case and then unplug the charger from the electric socket. Battery charging tips and precautions • If there is sweat or liquid on the charging contacts, corrosion may occur on the Galaxy Buds2.When there is sweat or liquid on the charging contacts or earbuds, clean them before inserting the earbuds in the charging case. When the remaining battery level is low, a notification will appear on the mobile device’s notification panel. • Availability of all accessories is subject to change depending entirely on manufacturing companies. The touch-sensitive sensors will detect that you are wearing the earbuds when you put them on.Then, the earbud will emit a sound informing you that the earbud is detected. Incompatible battery, charger, and cable can cause serious injuries or damage to your device. Bluetooth device cannot locate your earbuds • Close the charging case again and open it to enter the Bluetooth pairing mode. • Always turn the volume down before using the earbuds and use only the minimum volume setting necessary to hear your conversation or music. If you drag the bar to the left, the left earbud’s volume will increase and vice versa. • You may experience drops in volume or noise depending on the connected device’s volume.To avoid this, appropriately adjust the connected device’s sound. • Avoid bending the USB cable. Also, you can find them by following the beeping sound emitted from your earbuds. 3 Follow the same procedure for the opposite earbud. If the Galaxy Buds2 continue to overheat, contact a Samsung Service Centre. • If you experience any skin irritation while you are wearing the earbuds, stop wearing them immediately and consult a specialist. Refer to Setting a touch-and-hold feature for more information. Basics 10 1 Open the charging case. • Answer or end a call. • The location of the wireless charging coil may vary by device. Earbuds settings View information related to the earbuds and change various settings. Answering or declining a call When a call comes in while you are wearing the earbuds, they will emit a sound and a voice notification will inform you of the incoming call’s phone number or the name saved in your contacts. 1 Launch the GalaxyWearable app on the mobile device and tap Earbuds settings. Using the earbuds 20 Tips and precautions for using Bluetooth Bluetooth is a wireless technology standard that uses a 2.4 GHz frequency to connect to various devices over short distances. • It will likely not have a huge impact on the life of your Galaxy Buds2 even if you do not remove your earbuds from the charging case after the earbuds are fully charged. Alternatively, launch the Settings app on the mobile device, tap Connections → Bluetooth, and then unpair the earbuds from your mobile device under Paired devices. If necessary, update the GalaxyWearable app to the latest version. Some situations may not apply to your Galaxy Buds2. Coupling the earbuds When you lose one of the earbuds, you do not have to purchase a new set of earbuds because you can make a new set of earbuds with a newly purchased earbud and the other earbud that you already have. Doing so may distract your attention and cause an accident, or may be illegal depending on your region. If the battery gets hotter than usual, the charger may stop charging. • If the touch-sensitive sensor does not make contact with your ear, the earbud may not work. Ending a call Double touch the earbud to end the current call. • Appearances and specifications are subject to change without prior notice. Using the earbuds 22 1 Hold the upper and lower sides of each earbud and remove them from the charging case. If you tap the Speak seamlessly switch to activate it, you can say the command you want right away without waiting for audio feedback. • Use only USBType-C cable supplied with the Galaxy Buds2.The charging case may be damaged if you use Micro USB cable. • If the earbuds do not connect to a mobile device, the connection pop-up window does not appear, or your mobile device cannot find the earbuds, store them in the charging case and touch and hold both earbuds for more than three seconds to enter Bluetooth pairing mode manually.When Bluetooth pairing mode has been entered, the earbud battery indicator light will flash from red to green. 1 Select the ear tip that fits your ear. • If only a single earbud is connected to your mobile device, you will hear the sound in mono. Do not wear the earbuds in high-traffic areas, such as roads or crosswalks. • Triple tap: Play previous track. Launch the GalaxyWearable app on the mobile device, tap Earbuds settings → Labs, and then tap the Gaming mode switch to activate it. To decline the call, touch and hold the earbud. 4 On your mobile device, activate the Bluetooth feature to connect the earbuds to your mobile device, launch the GalaxyWearable app, and then follow the on-screen instructions to complete the connection. Make sure the earbuds are clean and dry before wearing them. Access additional options. 5 After fully charging, disconnect the charging case from the wireless charger. • Bluetooth uses the same frequency as some industrial, scientific, medical, and low power products and interference may occur when making connections near these types of products. • Bixby: Start a conversation with an intelligent voice assistant service.When using Bixby, refer to Using Bixby for more information. Conversely, activate the ambient sound mode to hear your surroundings clearly, so you can quickly detect any potentially dangerous situations or hear another person’s voice during a conversation. IE Page 4 www.samsung.com USER MANUAL English. Avoid using earbuds in dry environments or touch a metal object to discharge static electricity before using the earbuds. This feature is available only when connecting with a Samsung mobile device that uses the Android OS. Launch the GalaxyWearable app on the mobile device, tap Touch controls, and then tap the switch to activate it. Accessibility Configure various settings to improve the accessibility of the earbuds. To restart the earbuds, insert the earbuds into their corresponding slots in the charging case, which is not discharged, and remove them after seven seconds or more. If you remove the earbuds from your ears during the earbud fit test, the test will stop. On the mobile device that you want to switch to, launch the Settings app, tap Connections → Bluetooth, and then select earbuds under Paired devices. • You can download the GalaxyWearable app only on mobile devices running Android operating system 7.0 (API 24), or later, and with 1.5 GB of RAM or more. • If you touch the charging contacts while charging the charging case, it may affect charging. • Restart the mobile device and relaunch the GalaxyWearable app. Basics 11 5 Plug the charger into an electric socket. Bixby will launch the function you request or show the information you want on the connected mobile device when it recognises what you say through the earbuds. IE • If the earbuds are not positioned correctly in your ears, features like calling through the earbuds may not work. Activating from the GalaxyWearable app 1 Launch the GalaxyWearable app on the mobile device and tap Ambient sound. 2 Touch and hold both earbuds for seven seconds or more. Also, the batteries of earbuds which are not being stored in the charging case will drain. Battery indicator lights identification The battery indicator lights inform you of your earbuds and the charging case’s charging status. Using Bixby 1 Make sure you set a touch-and-hold feature for launching Bixby and touch and hold the earbud. Launch the GalaxyWearable app on the mobile device and tap Earbuds settings → Earbuds software update. Ensure to keep the earbuds away from electromagnetic waves. Equaliser Select an equaliser option you want to use. Content is subject to change without prior notice. Your Galaxy Buds2 are hot to the touch When you use the Galaxy Buds2 for an extended period of time, they may feel hot to the touch.This is normal and should not affect your Galaxy Buds2’s lifespan or performance. • Volume down/Volume up: Adjust the volume. 4 On your mobile device, tap Connect on the pop-up window and follow the on-screen instructions to complete the connection. Mobile Displays Computing Appliances Industries Offers Insights Support Global Sites For Consumers www.samsung.com USER MANUAL English. The charging time and the battery life is different between the earbuds • The charging time may differ between the two earbuds even if they started charging at the same time. • Bluetooth®is a registered trademark of Bluetooth SIG, Inc. Launch the GalaxyWearable app on the mobile device and tap Earbuds settings. Using unapproved accessories may cause the performance problems and malfunctions that are not covered by the warranty. Use the ear tips that fit your ears if you do not hear a sound informing you that the earbud is detected. Images may differ in appearance from the actual product. Launch the GalaxyWearable app on the mobile device and tap → Add new device. The batteries of the earbuds and the charging case are charged simultaneously. Sound echoes during a call Adjust the volume on the connected mobile device or move to another area. When you activate this feature, the Bixby voice wake-up feature on your connected mobile device will also be activated automatically. 3 Hold the earbuds so that you see the imprinted direction marks, and insert the earbuds into your ears until they fit comfortably in your ears. It can connect and exchange data with other Bluetooth enabled devices, such as mobile devices, without connecting via cables. Launch the GalaxyWearable app on the mobile device and tap the Touch controls switch to deactivate it. 6 After fully charging, disconnect the charging case from the charger. • If the Galaxy Buds2 are not charging properly, take the Galaxy Buds2 and the charger to a Samsung Service Centre. Precautions for wireless charging Do not place the charging case on the wireless charger when conductive materials, such as metal objects and magnets, are placed between the charging case and the wireless charger. To manually disconnect the earbuds from your mobile device, launch the GalaxyWearable app on the mobile device and tap → . 2 Close the charging case. Notices for using Bluetooth • To avoid problems when connecting your earbuds to another device, place the devices close to each other. Adjust the device and the charging case to make a strong connection. Magnetic stripe cards, including credit cards, phone cards, passbooks, and boarding passes, may be damaged by magnetic fields. Launch the GalaxyWearable app on the mobile device and tap Find My Earbuds. Appendix 41 Your earbuds sound comes slower than the screen when playing videos and games The earbuds may have a time lag between the video and sound output when playing videos or games when connected to a mobile device. 2 Check the direction of each earbud. Your earbuds do not work • The battery may be completely discharged. IE Page 6 www.samsung.com USER MANUAL English. Launch the GalaxyWearable app on the mobile device and select a feature and change its settings. Basics 9 Charging the battery Wired charging Fully charge the battery before using the earbuds for the first time or when they have been unused for extended periods.The earbuds will start to work while charging.When you charge the battery for the first time or when the battery is completely discharged, it needs at least 10 minutes to start to work. • If you charge the Galaxy Buds2 while charging the device that functions as a wireless charger, the charging speed may decrease or the Galaxy Buds2 may not charge properly, depending on the charger type. • Ambient sound: Activate the ambient sound mode. Charging case Charging contacts (right) Charging case battery indicator light Charging contacts (left) Charger port (USB Type-C) Wireless charging coil Earbud battery indicator light If there is sweat or liquid on the charging contacts, corrosion may occur on the Galaxy Buds2.When there is sweat or liquid on the charging contacts or earbuds, clean them before inserting the earbuds in the charging case. • Touch and hold: Select a feature to be used as the touch-and hold feature. Speaker Microphone hole Air duct Do not use anything sharp or excessive force while removing earwax or debris.The microphone hole, speaker, and air duct may be damaged. • Avoid speaking in dialectal accents. Refer to Setting a touch-and-hold feature for more information about changing feature you want to activate. The earbud battery indicator light will keep flashing red when the earbuds are not coupled properly. • Switch noise controls:The following features will be launched in order whenever you touch and hold the earbud: active noise cancelling and ambient sound mode. • Speak in quiet places. To change your Galaxy Buds2’s name, tap Edit. 2 Say what you want to Bixby. • When you are not using the earbuds, do not wear them, but store them in the charged charging case.The touch-sensitive sensor will continue to work while wearing the earbuds and reduce the usage time even though you are not using the earbuds. No part of this manual may be reproduced, distributed, translated, or transmitted in any form or by any means, electronic or mechanical, including photocopying, recording, or storing in any information storage and retrieval system. • To save energy, unplug the charger when not in use.The charger does not have a power switch, so you must unplug the charger from the electric socket when not in use to avoid wasting power. • If the charging contacts are dirty, the battery may not charge properly.Wipe the charging contacts with a dry cloth and try charging the battery again. • Double tap: Play next track. If worn improperly, you will not be able to hear the call audio through the earbuds, even if the Bluetooth icon appears on the connected mobile device. Using the earbuds 30 Using call features When wearing the earbuds while they are connected to a mobile device, you can answer and control calls from the connected mobile device. Charging viaWireless power sharing 1 Open the charging case. Earbuds software update Update your earbuds’software via the firmware over-the-air (FOTA) service. worldwide. • Chargers are sold separately. IE Page 10 www.samsung.com USER MANUAL English. 2 Tap Bixby voice wake-up and tap the switch to activate it. The earbud battery indicator light will flash green and turn off.Then, the earbuds are coupled. Appendix 39 A Bluetooth connection is not established or your earbuds and the mobile device are disconnected • Ensure there are no obstacles, such as walls or electrical equipment, between the devices. 2 Close the charging case, open it again to enter Bluetooth pairing mode. Before cleaning the speaker, detach the ear tip from the latch at the bottom of the earbud. On your mobile device, launch a music player app and play music. If you are a user of any of these Medical Devices, DO NOT USETHIS DEVICE AND SOME ACCESSORIES (SOLD SEPARATELY) UNLESSYOU HAVE CONSULTEDWITHYOUR PHYSICIAN. Precautions for using the earbuds • Excessive exposure to loud sounds can cause hearing damage. Touch and hold • Activate a preset feature. If you do not hear a sound informing you that the earbuds are detected, remove the earbuds from your ears and put them in again. Bixby will launch a function you request or show the information you want on the connected mobile device. • To charge properly, do not move or use either the device that functions as a wireless charger or the charging case while charging. 3 Connect the earbuds to a mobile device. • Adjust the volume via your connected mobile device if a sound is low in your earbuds while at full volume. Using the earbuds 21 Wearing the earbuds Adjust the earbuds to fit your ears. You can talk to Bixby. Launch the GalaxyWearable app on the mobile device and tap Earbuds settings → Read notifications aloud. • Using a power source other than the charger, such as a computer, may result in a slower charging speed due to a lower electric current. Refer to Connecting to a mobile device for more information. • The power charged to the Galaxy Buds2 may be less than the amount shared to them by the device that functions as a wireless charger. Close the charging case again and open it.The earbuds will enter Bluetooth pairing mode. Seamless earbud connection You can quickly change which mobile device to connect your earbuds with.You can activate the feature to switch the connection from your current mobile device to a nearby mobile device logged in to the same Samsung account or a device that has previously connected with your earbuds. If you have an implantable medical device, consult your physician before use. • If the battery indicator lights do not work as described, disconnect the charger from the charging case and reconnect it. English may appear by default if the selected language on the Settings app is not supported on the GalaxyWearable app. If the app is not installed on your mobile device, download the app from Galaxy Store or Play Store. Read notifications aloud You will receive notifications from the mobile device’s apps via the earbuds. • The supplied items are designed only for the Galaxy Buds2 and may not be compatible with other devices. Viewing Galaxy Buds2 status and customising settings View the status of the Galaxy Buds2 that are connected to your mobile device and change their settings. • Left/right sound balance: Adjust the right and left volume balance if you have a hearing impairment or if using a single earbuds is more convenient. Listening to music Listen to music saved in your mobile device by connecting the earbuds to the mobile device. • While charging, the Galaxy Buds2 and the charger may heat up.This is normal and should not affect the Galaxy Buds2’s lifespan or performance. If the microphone (the outer microphone while wearing the earbuds) and its area are covered completely, feedback may occur when launching the active noise cancelling feature. The earbud battery indicator light is located inside of the charging case and shows the charging status of the earbuds.The charging case battery indicator light on the front of the charging case indicates the charging status of the case itself. 08/2021. Use Samsung-approved wireless chargers. Setting a touch-and-hold feature You can set a touch-and-hold feature of each earbud to activate features quickly and conveniently. • Your device contains magnets. • The connection pop-up window will appear only on Samsung mobile devices running Android operating system 8.0 or later that have the SmartThings app installed. Launch the Settings app on your mobile device and tap General management → Language. 1 Check the direction of each earbud and correctly insert them into their corresponding slots in the charging case. Find My Earbuds If you misplace your earbuds, use the GalaxyWearable app on your mobile device to find it. Device layout Earbud Touch-sensitive sensor Ear tip Charging contacts Speaker Microphone Microphone Antenna /Touch area Basics 7 If you use the earbuds when they are broken, there may be a risk of injury. • If there is sweat or liquid on the charging contacts, corrosion may occur on the Galaxy Buds2.When there is sweat or liquid on the charging contacts or earbuds, clean them before inserting the earbuds in the charging case. Bixby will be launched on your connected mobile device. • Some functions may not work as described in this manual depending on the maker and model of the mobile device you connect to the device. 31 GalaxyWearable App Introduction To connect the earbuds to a mobile device, you must install the GalaxyWearable app on your mobile device. Tips and precautions when connecting to the mobile device • If the earbuds do not connect to a mobile device within three minutes, Bluetooth pairing mode will be deactivated. • When you insert your earbuds in the charging case, the charging will start automatically, and it will stop automatically if earbuds are fully charged. Rev.1.0 SM-R177 2 Table of Contents Basics 3 Read me first 5 About the Galaxy Buds2 6 Device layout and functions 8 Attaching an ear tip to the earbud 9 Charging the battery 14 Battery indicator lights identification Using the earbuds 16 Connecting to a mobile device 21 Wearing the earbuds 23 Using the earbud by touch 26 Using the noise controls mode 27 Using Bixby 28 Listening to music 29 Using the equaliser 30 Using call features GalaxyWearable App 31 Introduction 32 Connecting and disconnecting the earbuds 33 Viewing Galaxy Buds2 status and customising settings Appendix 38 Troubleshooting 42 Managing the Galaxy Buds2 43 Restarting the earbuds 43 Coupling the earbuds 44 Removing the battery 3 Basics Read me first Please read this manual before using this device to ensure safe and proper use. Drag the Left/right sound balance adjustment bar to adjust the balance. Close the charging case again and open it.The earbuds will enter Bluetooth pairing mode. Then, touch and hold both earbuds for seven seconds or more. Launch the GalaxyWearable app on your connected mobile device. If you touch the earbud three times three seconds after a track begins playing, it will start the track from beginning.Touch the earbud three times within three seconds of when a track begins playing to play the previous track. Some features, such as the noise controls mode or Bixby voice wake-up, may affect the usage time of your earbuds. • The appearance of the pop-up window may vary depending on your connected mobile device. Activating the noise controls mode Activating from the earbuds Make sure that the touch-and-hold feature is set to the noise controls mode and then touch and hold the earbud. • Ensure that your earbuds and the other Bluetooth device are within the maximum Bluetooth range (10 m).The distance may vary depending on the environment the devices are used in. 1 Check the direction of each earbud, the newly purchased earbud and previously used earbud, and correctly insert them into their corresponding slots in the charging case. • Ensure that the charger is connected properly to the charging case. • You can change the language of the GalaxyWearable app on your mobile device. If the pop-up window does not appear, update the SmartThings app to the latest version. 16 Using the earbuds Connecting to a mobile device Before the connection • Charge the charging case sufficiently. • Last update:View the information for the latest software update. The SmartThings Find screen will appear and you can check your misplaced earbuds’location on the map. 1 Open the charging case.
